ABSTRACT

The flourishing e-commerce industry still suffers from major limitations: customs duties are too high and often unjustified; we're interested in a product but the store doesn't offer shipment to our area; large distributors offer a diversified supply based on the geographic area and this is often not in line with the customer needs.

A UNIQUE PROJECT IN THE LOGISTICS

LWF Coin is the currency based on DPOS technology. A democratic and decentralized system on which the LWF logistic system is based.

This situation is due to several causes: protectionism, lack of logistic capillarity and the fact that the policies of some online sale giants are often questionable. Asia, South America and Russia are the most affected by these issues.

Logistic companies, on the other hand, have centralized systems that are not based on standardized management systems and that are constantly updated and modified. This makes it difficult and expensive the integration between logistics companies, which, moreover, do not have decentralized and innovative landmarks in the field of logistics management.

INTRODUCTION

The heart of our project will be a multi-service logistics platform supported by a DPOS-based blockchain, capable of decentralizing all the information of a logistics supply chain: in this way the management system becomes unassailable and for the first time in the world, there is a logistic standard on a DPos blockchain.

**A PLATFORM
REVOLUTIONIZING
THE LOGISTICS IN
THE WORLD**

The DPO-based Blockchain will allow us to create a scalable and secure environment in which we can set all information about shipments, feedback, freight forwarders involved , media management, shipping status and dispute management.

Our P2P platform will be based on sophisticated matching algorithms and user-friendly interfaces and on our DPos blockchain, on which we will develop our entire logistic database, alongside the platform itself.

Anyone in the world (after a proper verification and if certain requirements are satisfied) will be able to sign up through our platform or mobile application and provide one or more P2P services available on our platform.

P2P Freight Forwarding, Pickup and Delivery Point, and Express Delivery of Packages.

These services will be protected by an effective anti-fraud system, escrow and dispute management, and will allow anyone to get an active income in safety thanks to our platform. At the same time, it makes possible for emerging countries, to get goods that would otherwise be impossible for them to receive.

The payments accepted on the platform will be LWF coin, BTC and EUR / USD. Since multiple transactions on our blockchain are required in order to enter the data, higher fees will be charged for those who will use different payments from the LWF.

DPOS LWF COIN

LWF is the coin created by the first integration of a DPos system for logistics.

- A democratic vote system that allows a system always efficient and safe.
- A default payment method for our services with very low network fees.
- A tool that allows anyone to “vote” and “create” LWF by becoming a delegate, based on how many coins you own.
- Through its transactions it allows you to transcribe logistical and strategic information on the blockchain, maintaining the platform active and guaranteeing decentralized logistic management.

In the beginning, our main focus was the development of the P2P portal. However, we have realized that the decentralization has to involve not only the “portal” by offering a peer to peer service, but also directly the base of the data itself. So we decided to develop our own blockchain that will develop all the functions in order become a global standard for maintaining and managing logistic data.

BLOCKCHAIN DPOS

DPoS (Delegated Proof of Stack Technology):

This system represents an evolution started from the PoS (Proof of Stake), also developed in order to reduce costs and inefficiencies associated with electricity consumption, typical of the PoW (Proof of Work) systems used for example by Bitcoin. The DPoS system, implemented for the first time on Bitshares by developer Daniel Larimer, differs from the PoS system. This one in fact, in order to validate a transaction, involves the involvement of the entire network.

In the DPoS system, however, this burden does not involve the whole network, but is a duty for a limited number of delegates.

These delegates, elected by the whole network with a democratic vote system, validate every single transaction on the LWF network. Within this Transaction Validation System, each delegate receives a reward in LWF Coins in the form of transaction fees, in order to cover the operating costs required to maintain the main nodes (which deal with the validation of the transactions).

DPoS: Why create your own currency and your own blockchain?

A logistics blockchain:

What led us to opt for DPOS technology was a series of technical and logical evaluations that we think we need to share with you in order to better understand the benefits and potential of this technology.

The Dpos will enable us to create a secure, decentralized and performance-based logistics database through the blockchain and network-generated transactions: that will enable us to develop technology to make it a future standard for global logistics.

LWF COIN

Any logistics or handling company will be able to lean on our DPos blockchain, keeping in this way its data in a distributed database that will safeguard the company's data, making any logistic operation unassailable to any threats related to classical information systems (Virus, IT, Cloud Connectivity or Remote Servers).

It will allow to aggregate all information related to the supply chain logistics within the transactions and the network, making them accessible quickly and safely by companies that are participating in the network.

BENEFIT

Legal Approach:

Through this technology, it will be possible in a blockchain to have a "notary" form to certify a date, time and data entered. The hash and distribution of nodes in the LWF network will make the data inalterable and verifiable at any time, excluding any possibility of tampering by malicious people in the network.

Scalability:

Our network will be an integrable solution everywhere, will solve the problem of logistics management software, which too often "customs" fail to comply and allow a unique standard for all companies in the industry; not allowing integration between them and often requiring developer maintenance, and integration over time.

Data security and privacy:

All data will be encrypted and readable only by the respective data creators, so the privacy of the users, companies and users in the chain will be respected.

Democracy:

What we wanted to do with the Token LWF ERC20 was to make our investors participate in the company thanks to the dividends. With LWF Dpos, many business choices will be shared; the community itself can make the most

important decisions. This will be possible by letting the community votes, democratically expressed, decide on directions and strategies. These democratic choices make LWF a network where every person can have their decision-making weight on the P2P platform as well as on the nodes that generate, manage, and maintain the entire network.

TECHNICAL INFORMATION:

- Testnet: 13/11/2017
- Main net (Roadmap Information)
- Blocktime: 15 seconds
- Delegates: 201
- Votes: 52
- Rewards per block: 5 LWF first year
- Premined: 100.000.000 (75% in TEC).

BUYBACK PROGRAM

Will be possible thanks to an integration with the most used online exchanges, make direct exchanging LWF/BTC.

BUYBACK METHOD	TRANSACTION FEES
LWF to BTC	3%

BUSINESS MODEL

In addition to providing direct logistics solutions, the platform will act as an intermediary to provide the necessary infrastructure for a series of p2p services, charging the vendor commissions based on the type of payment used by the buyer (and accepted by the vendor).

PAYMENT METHOD	TRANSACTION FEES APPLIED
LWF	7%
Bitcoin	11% (brokerage between exchanges)
Eur/Usd	16% (accounting management, bank charges)

To encourage maximum inclusiveness and adoption, a wide range of payment methods will be accepted: LWF Coins and common currency (EUR/USD) through select gateways. The same channels will be available for the withdrawal of profits by the brokerage service providers.

P2P FREIGHT FORWARDING

This service implements a decentralized freight forwarding network, which will guarantee a comprehensive solution alongside our internal network.

The private freight forwarder will receive buyers' packages at their home or other suitable location and forward them: it will set the coverage limits of its service and a selection of possible shipping methods and the relative delivery costs and times, in addition to its own commission amount by entering this information into our system.

Anyone can begin to provide the service by registering via the special form: full identification (know your customer - KYC) and a security deposit will be required to discourage improper use of the system and in order to manage disputes and feedback. All data and deposits collected will be kept according to the highest security standards.

Vendor subdivision will be carried out in levels, determined by the number of packages forwarded or delivered, the feedback received and the dollar volume reached. The deposit for vendors will be at the user's discretion in the first level, up to a threshold calculated by the system based on the number of properly managed shipments, the level of feedback obtained and an amount not exceeding \$ 750. It will therefore be possible to start with just a few dollars and gradually increase the amount of the security deposit, considering that packages can be assigned for a maximum total value of up to 150% of the security deposit's value; thus the greater the security deposit, the higher the

BUSINESS MODEL

likelihood of matching and the number of manageable shipments.

From the second level and above, the security deposit will be fixed and predefined.

The security deposit can be made through all channels accepted by the platform: cryptocurrency and LWF Coins will be converted into ordinary currency (USD/EUR) at the time of receipt and promptly approved, while traditional channels will require longer for approval and additional checks will be needed to avoid any fraudulent use. The security deposit will be reimbursed using the same method chosen at the time of its payment and the vendor must have met all website standards and policies, with a 100% feedback score and no disputes in progress.

Buyers can request services through a simple and functional interface, while our matching algorithm will display a choice of suitable offerings according to various selectable parameters such as origin, destination, weight and dimensions, package value, shipping rates, evaluated quality of the service offered by the vendor to that state and forwarder commissions and feedback. In the absence of suitable solutions or for packages of higher value, alternatives will be proposed through our partnerships and internal logistics network. Integrated communication channels will be available to improve cost and

P2P FREIGHT FORWARDING

method agreements.

Once an agreement has been reached, the buyer will deposit the sums to cover the shipping and commission costs in our escrow system, which will release it to the forwarder in the following steps: as soon as we are provided proof of the package's delivery to the courier with its tracking number the cost of the shipment will be issued, and as soon as the buyer confirms the correct receipt of the goods the commission will be issued. See the dispute resolution section for more details.

PRIVATE COLLECTING POINTS

The package collection service will be offered with the same methods.

With convenient open hours, customers can collect their packages at private collection points nearby, arranging the pick-up directly with the designated forwarders.

The vendor can also agree to a direct delivery to the buyer.

MOBILE & EXPRESS DELIVERY

With the subsequent development of the mobile app and the consolidation of the area's service providers network, businesses and private users will be able to take advantage of rapid deliveries in their area: the system will show delivery requests in surrounding areas in real time in the app, and vendors will be able to accept these requests by going directly to the customer at the point indicated on the map at the time requested and completing the delivery with its own

BUSINESS MODEL

the guarantees of our customer protection system.

The customer will be notified with details of the vendor chosen for delivery: car colour or model, name and surname and physical features, in order to avoid scams or theft.

An on-demand delivery system where and when it is required, which is able to minimize the requester's management burden.

DIRECT LOGISTICS

Some local logistics partnerships are already underway and two fully equipped operating facilities located in Italy are already available to LWF. Once the established milestones have been reached, and subsequently with business expansion and brand consolidation, the infrastructure will be strengthened by its presence in other countries, and eventually the possibility of offering traditional shipping services with its own means, gaining further market shares.

DIRECT LOGISTICS

TARGETED ADVERTISING

One of the additional services currently being studied is the possibility for companies to contact us and purchase advertising space for the targeted insertion of their own brochures or other merchandising during the repackaging offered by LWF's internal logistics (none of the customer's personal data will ever be communicated to third parties).

DISPUTE RESOLUTION AND ANCILLARY INSURANCE

Dedicated staff will handle any disputes between brokered counterparts according to a set of criteria and best practices in order to obtain complete protection of the service's security: all steps for completing orders will include suitable procedures to prove and document the correct execution, with clear instructions on the platform in advance. These will include photographic and video proof of package management and formal complaints to the authorities if any complaints are lodged by the recipient.

In the case of a proven disservice by the vender, a full refund of the contents of the shipment is provided.

These warranties will only cover our direct services and those operated by the brokerage service providers: for any issues caused by couriers during reshipping or caused by the shipper, it will be necessary to contact their customer care or have signed for total LWF insurance for the product.

BUSINESS MODEL

means, earning a commission. All this while constantly being able to count on

The total insurance will allow, via payment of a flat percentage based on the object's declared value (which requires documented proof), the shipment's protection and will include access to customer care that will carry out the above checks and confirm and provide a refund if the package is stolen, lost or irreparably damaged in any stage following the forwarder's reception (the tracking must note whether the package was lost, or signed with a reserve if the package is damaged). The refund percentage in this case will be 90%* of the verified value of the shipped item.

ECONOMIC DATA AND PROJECTIONS

LWF will become part of the shipping and logistics branch which accounts for nearly 19% of the total volume of shipments: Healthcare & Pharmaceuticals and Retail & Consumer Products (with a tremendous growth perspective).

An analysis of the micro-areas led to our development forecast which indicates that we could realistically acquire, after the first year of activity, the following percentages:

Retail & Consumer Products (global total 15%): 0.0003%.

Healthcare & Pharmaceuticals (global total 4%): 0.005%.

The estimated annual business volume for shipments divided per sector is:

ECONOMIC DATA AND PROJECTIONS

For LWF, the estimated volume will be \$ 13,750,000/year for retail and freight forwarding. The revenue generated by third-party transactions and services will instead be \$ 265,000 for the Wellness sector, and \$ 715,000 for Retail and Freight forwarding. For a total of \$ 980,000, of

which 50% will be divided among the investors.

Our growth target in the first 36 months forecasts the increase of acquisition percentages on retail and consumer products to grow to 0.003% on a global scale, bringing the volume to around: \$ 60,000,000 and profits for about: \$ 5,000,000.

PROJECT MILESTONES

	\$300,000+	\$1,000,000+	\$3,000,000+	\$10,000,000+
Development	Main platform release. Services: P2P Freight Forwarding, Collection Point.	Mobile APP Release with Express Delivery service	Logistics management development to manage its own means.	Platform 2.0 Integration with car sharing services for the capillary acquisition and expansion of services around the globe. 25M users in 24 months.
Marketing	Adv campaign on targeted channels, acquisition of retailers and consumer agencies. Creation of LWF gadgets for packaging.	Sponsor Acquisition with brochure and gadget insertion for internal logistics. Increase of already existing Marketing operations.	Targeted advertising campaigns in emerging countries, an international event presenting the services in London.	Targeted marketing in India, Russia, Brazil, Argentina, the USA, Canada, Australia and Korea.
Internal logistics	Activation of logistics centres in Italy and guaranteed service continuity.	Repackaging and Advertising Service for Partners, Logistics offices in partnership in Canada	Opening logistics facilities (warehouse and storage with repackaging), India.	Opening of a logistics and handling facility in Moscow (Russia)
Legal	Drafting partnership contracts. Conversion of funds raised, also paying the taxes. Institution of a fund for insurance and customer protection.	Opening of legal headquarters operating in Asia (HK)	Opening of legal headquarters operating in NA (Seattle) and SA (San Paolo)	Acquisition of its own legal branch within the company including a lawyer experienced in logistics and international law and an accountant.
Blockchain	Development of the first two order insertion functions in blockchains and user registrations, listing on first exchange.	Development of dispute management, feedbacks, core development in order to increase transactions per second.	Development of integrative functions devoted to internal logistics, administrative and customs management, stocks, returns. Listing on other 2 exchange.	Opening a foundation for LWF Coin for the constant development of new technologies.

TEC

The TEC model was chosen as the type of crowdfunding because it is a clear system without any bureaucracy or dilution to discourage investors. It is easy for everyone to reach, and anyone who wants to invest can do so anonymously and participate in the project from anywhere in the globe.

The base value of Coins will be \$ 0,33 per unit.

100,000,000 LWF Coin will be generated.

**A SOLID
INVESTMENT AND
A CLEAR AND
TRANSPARENT
TEC.**

PRE SALE

The Presale will start on 23th October at 10:00 GMT and will end on 06th November at 15:00 GMT.

The equivalent of 4.666.200 LWF Coins (including the bonus) can be pre-allocated.

During the presale, a bonus of 35% will be provided on Coins received.

The Presale deliberately offers a limited number of Coins, as it is only intended to guarantee coverage for start-up costs, legal costs and the maintenance of the first LWF logistics facilities in Italy. Unsold PRE SALE Coins will be burnt.

TEC

Fundraising through the official TEC will begin on 27 November 09:00 GMT and end on 28 December 09:00 GMT. The minimum goal to be reached for the release of funds from escrow is \$300.000 (Total between Presale and TEC).

Token unsold will be kept in a frozen address for a second ico in the future or for avoid network abuses with votes.

Total TEC Coins: 73.333.800

Presale Coins: 4.666.200

TEC Coins: 73.333.800

Team/Bounty/ Marketing /Adviser
Coins: 22,000,000

Website URL: <http://lwf.io>

TEC Direct URL: <http://ico.lwf.io>

Division of Funds

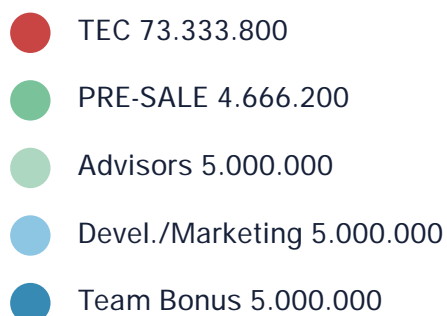

The funds raised will be broken down
as follows:

80%: Project development

5%: Legal and Commercial Support.

10%: Marketing.

5%: Reserve for insurance funds.

LEGAL

i) Premise:

Please read this section carefully; if you have any doubts, please consult with your trusted legal/commercial adviser.

1.1 Statute of liability

The LWF White Paper was approved by the majority of LWF Ltd.

The directors and members of the TEC executive and management team accept full responsibility deriving from the statements in the white paper and ensure, in good faith, that what is written does not contain false information or omissions that could compromise the project's successful outcome or the actual advantage that investors might have in any way if they decide to be part of the project.

1.2 Important Information

1.3

The LWF and its LWF Coins* are not intended to constitute a security in any jurisdiction.

This White Paper regarding the TEC does not constitute and is not intended as a prospect or proposes itself as a document of any legal value in any state, and does not intend to constitute a securities offering or a solicitation for investment in securities in any jurisdiction.

1.4

This White Paper is not, and should not be interpreted as a recommendation from the creators themselves for investing in the project. This WhitePaper does not replace, and should not be considered an independent analysis or commercial evaluation. Each recipient of the White Paper itself should have carried out market surveys and evaluations

and have carefully considered the investment in terms of risks, personal possibilities and any complications in his or her economic potential as a result of the investment itself.

1.5

The distribution of documents related to the White Paper, the Overview and any other information regarding this TEC may be prohibited by the laws of your state or jurisdiction. Anyone who wishes to distribute documents relating to this TEC must independently ascertain, through their advisers, the legitimacy of such documents' distribution in their country of residence or domicile. LWF declines any responsibility for the distribution of its produced documents in states where such distribution is restricted or prohibited.

1.6

No person is held, invited or required to enter into any commercial, legal or investment contract with respect to the LWF TEC or future investments in the project itself.

1.7

With regard to the purchase and sale of Coins deriving from the investments obtained by the TEC, each user will have full marketing and exchange freedom of the same by means of private exchange or buyer who is available for the same and has the legal ability to purchase such Coins in his/her state.

1.8

No legal authority has examined or approved these documents, which have been written using as an example the laws governing the publication of texts and documents in Europe at the time of publication. Such documents may not be approved or comply with the laws of investors'

states, in which case a lawyer should be consulted for further information regarding the structured rules of this TEC and the international laws to which it will be submitted once it is launched.

1.9

The risks associated with investments, the value of Coins and the finalization of the project will be appropriately clarified in the "Risks" section of this document.

1.10

Reproduction, modification or dissemination of this document for commercial or criminal purposes is strictly forbidden.

1.11

Accepting delivery of this White Paper (which is considered as its download, access to the Website: <https://lwf.io> or in any way accessing this White Paper), each recipient accepts the terms with which this White Paper is provided. The recipient also agrees and confirms that:

- A) he or she will keep all this information and data confidential;
- B) he or she has received this Document and/or purchased the LWF Coins legitimately in all jurisdictions to which the recipient is subject;
- C) he or she complies with all the applicable laws in relation to the receipt of this White Paper and the purchase of the LWF Coins themselves.;
- D) Executors and their respective directors, officials, employees and professional advisers are not and will not be in breach of the laws of a jurisdiction to which the recipient is subject following the delivery of the White Paper and/or the purchase of LWF and will not have any liability in the event that such delivery of the White Paper or the purchase of LWF is or becomes illegal, inapplicable, voidable or canceled;
- E) is aware that the LWF Coins will be offered, sold, transferred or otherwise disposed of directly or indirectly in accordance with relative sales restrictions and all applicable laws;
- F) has sufficient knowledge and experience in financial and commercial matters to be able to assess the merits and risks of purchasing LWF Coins and is able and willing to withstand the economic and financial risks of purchasing and/or holding the LWF Coins themselves.
- G) acquires LWF on his or her own account and not for third parties;

H) accepts and acknowledges that Coins issued by LWF must not be interpreted, classified or treated as:

- (I) any type of currency other than current cryptocurrencies;
 - (II) bonds, shares or shares issued by any person or entity;
 - (III) rights, options or derivative instruments relating to such bonds or shares;
 - (IV) the rights to secure a profit or to avoid a loss;
 - (V) units in any type of investment scheme;
 - (VI) units in any type of trust;
 - (VII) any form of derivative;
 - (VIII) any other guarantee or class of securities.
- I) is aware that the information contained in this White Paper may not be complete or may be modified later.
- J) is fully informed and aware of all matters relating to the purchase, sale and holding of LWF in any form whatsoever which cannot be specifically indicated in this Overview or White Paper document, but which may be disclosed to a person who can reasonably be inferred to have the knowledge and familiarity with the problems and complications of Cryptocurrencies such as Bitcoins, Ethereum and/or other types of cryptocurrencies and confirms in an irrevocable and unconditional manner that he or she has an understanding of the operation, functionality, usage, storage, transmission mechanisms and other material features of Cryptocurrencies, blockchain-based software systems, cryptocurrency wallets and smart contract technology.

1.12

This document may include certain historical information, estimates or reports arising from sources cited in this document or others related to the TEC, material activities carried out by the program's executors and other issues. No statement or guarantee is provided regarding the accuracy or completeness of any information, estimate and/or reporting of any such information or other third party sources.

1.13

The document includes "forward-looking statements". These statements include, among other things, the discussions of each of LWF's business strategies and expectations regarding its position in the economy, future operations, profitability, liquidity, assets and financial position. All of these statements are based on estimates and assumptions made by the program's executors who, although considered reasonable, are subject to risks and uncertainties that may cause real events and that the

results of the programs' executors are materially different from those anticipated or indicated by such declarations and estimates and no guarantees may be given that any such statements or estimates will be made. In the light of these and other uncertainties, the inclusion of a forward-looking statement in this document or the White Paper itself should not be considered as a representation or a guarantee by the TEC in any case.

1.14

This document and its contents are strictly confidential and the information contained herein is provided to the recipient strictly based on the fact that the recipient ensures that such information is confidential. Consequently, this document and its contents or any information made available to the recipient in connection with further investigations must be securely kept. In the event of a breach of this confidentiality guarantee or if it is reasonably likely that such confidentiality may be infringed on, the Program Authors may, at their discretion, request any remedy available to the program executors, whether under the law or based on net equity for damages. The executor programs' have the right to completely recover all the costs, expenses and losses incurred and/or suffered in this regard from the criminal subject. To eliminate any doubt, this confidentiality is held as attributable to the recipient, professional advisers, administrators, employees and other persons affected by the program, as well as executors or any other person to which the plans and goals of the program executors will reach.

1.15

It is forbidden to forward any property prohibited by the receiving or relocating jurisdiction, LWF assumes no responsibility for the goods delivered by the buyers or on the lawfulness of the states in which the goods are to be forwarded. Each Forwarder is required, if he has any notion that the goods delivered to him that he must forward are not in line with the standards of his country, to open a dispute on the LWF platform and immediately notify the authorities if the goods are related to Drugs, Hazardous or Radioactive Substances, Weapons or dangerous or banned objects.

1.16

Buyers will not be required to disclose the value or content of the package to the vendor aside from common information such as weight, size, type of goods and actual

source. Such information will only be communicated when sending the order as a confidential note reserved for LWF administrators and staff, who will keep the data private while respecting the privacy protection of both parties. The data concerning shipments, the values of the packages and their content will be provided to the authorities of the states involved if there are any related disputes or requirements.

1.17

Forwarders will be obliged to provide a receipt issued by the shipper used to forward the package, provide a photo of the package and use a special flag to communicate whether the package has been opened or has had its initial packaging modified. The vendor will assume every responsibility for sending the package to the buyer; any form of profit from the vendor's sales agreements with third-party shippers is absolutely legitimate and is not of our interest.

1.18

LWF does not allow citizens residing in the following states/continents to register as a Forwarder: Africa (agreements will be made for individual African states in the future), excluding South Africa and the Ivory Coast, North Korea, Vietnam, Bhutan, Afghanistan, Iraq, Iran, Libya, Syria, Serbia, Albania and Colombia

1.19

In accordance with the laws of the European Community and those laws in force in the UK, LWF has the right to act as a broker and supplier of logistics services. For legal/administrative questions, please send an email to legaloffice@lwf.io.

1.20

LWF does not guarantee and does not undertake to provide any returns to its participants. All that is written in the White Paper is based on industry studies and analyses carried out by professionals and technicians, which could be inaccurate or conclude with a negative outcome. The value of LWF Coins is absolutely uncertain and not guaranteed. The buyback commitment will be respected within the terms defined in this document.

1.21

LWF guarantees all its commitment and physical and mental effort to complete the project in the times described

and appropriately detailed in this document, however, it does not assume responsibility for project delays or delays due to third party events, legal, administrative or catastrophic events that could lead to an interruption in the project itself.

1.22

The risks section is organized to incorporate, along with these legal disclaimers, a type of warning to investors about the possible losses of an investment on a type of investment such as an TEC.

LWF London L.t.d.
